1990 Annual Index

Just in case you are not one of the many POULTRY DIGEST readers who saves (even has bound) every issue to form a continuous library of poultry production information, the following monthly breakdown of our indexing should be helpful in locating articles.

BREEDING AND HATCHING

Ozone may adversely affect hatchability, . . . JAN pg. 6
Irradiation did not affect hatchability, . . . JAN pg. 6
Mechanical nests: some features to consider when buying, . . . FEB pg. 18
Understanding eggs, hatching to improve poults, . . . FEB pg. 24
Breeder hen nutrition, feed quality potential problems, . . . FEB pg. 30
Breeder maturation process demands attention, . . . FEB pg. 38
Coccidiosis outbreaks in breeder pullets, . . . FEB pg. 37
E. coli in hatcher one airsacculitis cause, . . . FEB pg. 12
Management affects performance of breeders, . . . FEB pg. 12
Low protein did not enhance natural mating, . . . FEB pg. 13
Live fowl cholera vaccines work best, . . . FEB pg. 14
Chicks better when older hens were fed zinc, . . . FEB pg. 13
Formaldehyde in hatcheries: rules and monitoring explained, . . . MAR pg. 34
Flavoring feed might control breeder growth, . . . MAR pg. 6
Georgia couple diversifies business with breeder flocks, . . . JUN pg. 18
Iodine levels suggested for turkey breeder hens, . . . JUN pg. 8
Pest management programs demand special attention, . . . JUL pg. 16
Treating corn with mold inhibitor improved hatch, . . . JUL pg. 6
Fertility higher with separate male feeders, . . . AUG pg. 6
Evaluating lighting for breeders, . . . AUG pg. 20
Hatchability: many factors affect results, . . . SEP pg. 20
Hatchery managers discuss techniques and innovations, . . . SEP pg. 32
Minimizing contamination of hatching eggs a must, . . . SEP pg. 36
Sperm count affects egg fertility and hatch, . . . OCT pg. 6
Primary feather drop syndrome: new breeder problem, . . . NOV pg. 14
Oxygen essential for good hatch, . . . NOV pg. 36
Respiratory salmonellae spread less common, . . . NOV pg. 6
Salmonellae prevention ideas in broilers, broiler breeders, . . . DEC pg. 12
Chemical restriction of breeder pullet growth, . . . DEC pg. 6
Incubators should have regular service, . . . DEC pg. 64

BROILERS

Ramps, barriers aid broiler muscle growth, . . . JAN pg. 6
Broiler water intake up during acclimation, . . . JAN pg. 6
Shredded newsprint good broiler litter, . . . JAN pg. 54
Prevent problems with maintenance, . . . FEB pg. 50
E. coli in hatchers one airsacculitis cause, . . . FEB pg. 12
Chicks better if older hens had been fed zinc, . . . FEB pg. 13
Chick anemia agent may be new virus group, . . . FEB pg. 14
Mycotoxin effects worse when in combination, . . . FEB pg. 14
Mycotoxins can cause immunosuppression, . . . FEB pg. 17
Proper water vaccination requires certain techniques, . . . MAR pg. 30
Chick anemia agent difficult to control, . . . MAR pg. 33
Somatostatin termed ineffective for birds, . . . MAR pg. 8
Rearing under bright light reduced bruising, . . . MAR pg. 6
Drug combinations for *E. tenella* tested, . . . MAR pg. 6
Early immunization for tracheitis difficult, . . . MAR pg. 8
How to reduce water vaccination failures, . . . MAR pg. 14
Don't forget rodent control, . . . MAR pg. 16
Approved parasite controls limited, . . . MAR pg. 33
Georgia grower's houses designed for efficiency, profit, . . . APR pg. 12
Double check insurance on broiler housing, . . . APR pg. 69
Separation important for open houses, . . . APR pg. 9
Migrating beetles can bring complaints, . . . APR pg. 64
Water softener may cause wet droppings, . . . APR pg. 64
Minimize vaccination reactions, . . . APR pg. 68
Extruded carcasses and feathers in broiler feed, . . . APR pg. 5
Male broilers unaffected by changing diet energy, . . . APR pg. 5
Pancreas may be involved in malabsorption syndrome, . . . APR pg. 6
Malabsorption syndrome can damage intestines, . . . APR pg. 5
Tunnel ventilation needs proper design, . . . MAY pg. 22
Multiple stressors affect performance additively, . . . MAY pg. 36
Four firms have 45 per cent of broiler volume, . . . MAY pg. 44
Dead bird disposal in The Netherlands, . . . MAY pg. 44
Sail switch reduced fan running time, . . . MAY pg. 8
Beetles did not affect broiler performance, . . . MAY pg. 8
Saving by late removal of vitamins/minerals, . . . MAY pg. 8
Another approach: Fasting heat stressed broilers, . . . JUN pg. 32
Respiratory vaccine reactions reduced by TLC, . . . JUN pg. 20
Chick livability better with satellite waterer, . . . JUN pg. 6
Be sure withdrawal feeds are drug-free, . . . JUN pg. 10
Environment a factor in respiratory ills, . . . JUN pg. 10
Chick anemia agent: a new, different disease, . . . JUN pg. 42
More protein decreases ochratoxin effects, . . . JUN pg. 6
Broiler litter suitable in composted planting mix, . . . JUN pg. 6
Stocks react differently to trimming of beaks, . . . JUN pg. 8
Protect respiratory tract against Newcastle virus, . . . JUN pg. 6
Immune system and salmonella resistance, . . . JUN pg. 8
Managing bird migration in tunnel ventilated houses, . . . JUL pg. 32
Minerals may play role in sudden death syndrome, . . . JUL pg. 6
Extruded dead bird meal safe as feed ingredient, . . . JUL pg. 8
Climate may be factor in cryptosporidiosis, . . . JUL pg. 8
Dyschondroplasia varies with companies, . . . JUL pg. 6
Development of drug resistance a certainty, . . . JUL pg. 10
Broiler niacin needs, . . . AUG pg. 6
ILT: is eradication feasible?, . . . AUG pg. 14
Most effective feed withdrawal times, . . . AUG pg. 6
Carbohydrates retard salmonella colonization, . . . AUG pg. 6
Cold adapted viruses show promise as vaccines, . . . AUG pg. 6
Seed from weed can contaminate feed, . . . AUG pg. 8
Keep poultry waste away from water, . . . AUG pg. 10
How to avoid future problems with MD, . . . AUG pg. 10
Disease control and management related, . . . AUG pg. 10
Variety of signs make reoviruses complex challenge, . . . SEP pg. 15
Salmonella monitoring system simplifies evaluation, . . . SEP pg. 46
Apply heat stress data with caution, . . . SEP pg. 11
Vitamin pack helps during heat stress, . . . SEP pg. 42
Heat exchanger broiler houses have advantages, . . . SEP pg. 6
Boric acid treatment for darkling beetles, . . . SEP pg. 6
Drinker water depth affects litter conditions, . . . SEP pg. 6
Tenosynovitis lesions differentiated early, . . . SEP pg. 6
A simple skin test for immune response, . . . SEP pg. 8
Chick passage effects on campylobacter virulence, . . . SEP pg. 10
Fusarium toxicity complex, . . . SEP pg. 11
Listeria colonization of broilers studied, . . . SEP pg. 10
Changes in viral nature make control difficult, . . . SEP pg. 10
Farm size not factor in broiler performance, . . . OCT pg. 6
Broilers do well under various light sources, . . . OCT pg. 6
Yeast improved feed conversion of broilers, . . . OCT pg. 6
Lighting may affect skeletal disease, . . . OCT pg. 6
Chick anemia agent prevalent in Delmarva, . . . OCT pg. 6
Fowl cholera showing up in Georgia broilers, . . . OCT pg. 6
Salmonella surveyed in retail broilers, . . . OCT pg. 8
Right side heart failure said main cause of ascites, . . . NOV pg. 6
Effect of high protein corn on broilers, layers, . . . NOV pg. 6
Saving broiler house energy being studied, . . . NOV pg. 36
Electricity use compared in tunnel, natural ventilation, . . . NOV pg. 13
Water quality: what is it?, . . . NOV pg. 12
IB control still a major challenge, . . . NOV pg. 37
Salmonellae prevention ideas in broilers, broiler breeders, . . . DEC pg. 12
Cause of transient toxicosis unknown, . . . DEC pg. 16
Chicken anemia agent found in United States, . . . DEC pg. 6
Control wild birds in poultry houses, . . . DEC pg. 9

BROODING AND REARING

Prevent problems with maintenance, . . . FEB pg. 50
Water softener may cause wet droppings, . . . APR pg. 64
Minimize vaccination reactions, . . . APR pg. 68

1990 Annual Index

Just in case you are not one of the many POULTRY DIGEST readers who saves (even has bound) every issue to form a continuous library of poultry production information, the following monthly breakdown of our indexing should be helpful in locating articles.

BREEDING AND HATCHING

Ozone may adversely affect hatchability, . . . JAN pg. 6
Irradiation did not affect hatchability, . . . JAN pg. 6
Mechanical nests: some features to consider when buying, . . . FEB pg. 18
Understanding eggs, hatching to improve poults, . . . FEB pg. 24
Breeder hen nutrition, feed quality potential problems, . . . FEB pg. 30
Breeder maturation process demands attention, . . . FEB pg. 38
Coccidiosis outbreaks in breeder pullets, . . . FEB pg. 37
E. coli in hatcher one airsacculitis cause, . . . FEB pg. 12
Management affects performance of breeders, . . . FEB pg. 12
Low protein did not enhance natural mating, . . . FEB pg. 13
Live fowl cholera vaccines work best, . . . FEB pg. 14
Chicks better when older hens were fed zinc, . . . FEB pg. 13
Formaldehyde in hatcheries: rules and monitoring explained, . . . MAR pg. 34
Flavoring feed might control breeder growth, . . . MAR pg. 6
Georgia couple diversifies business with breeder flocks, . . . JUN pg. 18
Iodine levels suggested for turkey breeder hens, . . . JUN pg. 8
Pest management programs demand special attention, . . . JUL pg. 16
Treating corn with mold inhibitor improved hatch, . . . JUL pg. 6
Fertility higher with separate male feeders, . . . AUG pg. 6
Evaluating lighting for breeders, . . . AUG pg. 20
Hatchability: many factors affect results, . . . SEP pg. 20
Hatchery managers discuss techniques and innovations, . . . SEP pg. 32
Minimizing contamination of hatching eggs a must, . . . SEP pg. 36
Sperm count affects egg fertility and hatch, . . . OCT pg. 6
Primary feather drop syndrome: new breeder problem, . . . NOV pg. 14
Oxygen essential for good hatch, . . . NOV pg. 36
Respiratory salmonellae spread less common, . . . NOV pg. 6
Salmonellae prevention ideas in broilers, broiler breeders, . . . DEC pg. 12
Chemical restriction of breeder pullet growth, . . . DEC pg. 6
Incubators should have regular service, . . . DEC pg. 64

BROILERS

Ramps, barriers aid broiler muscle growth, . . . JAN pg. 6
Broiler water intake up during acclimation, . . . JAN pg. 6
Shredded newsprint good broiler litter, . . . JAN pg. 54
Prevent problems with maintenance, . . . FEB pg. 50
E. coli in hatchers one airsacculitis cause, . . . FEB pg. 12
Chicks better if older hens had been fed zinc, . . . FEB pg. 13
Chick anemia agent may be new virus group, . . . FEB pg. 14
Mycotoxin effects worse when in combination, . . . FEB pg. 14
Mycotoxins can cause immunosuppression, . . . FEB pg. 17
Proper water vaccination requires certain techniques, . . . MAR pg. 30
Chick anemia agent difficult to control, . . . MAR pg. 33
Somatostatin termed ineffective for birds, . . . MAR pg. 8
Rearing under bright light reduced bruising, . . . MAR pg. 6
Drug combinations for *E. tenella* tested, . . . MAR pg. 6
Early immunization for tracheitis difficult, . . . MAR pg. 8
How to reduce water vaccination failures, . . . MAR pg. 14
Don't forget rodent control, . . . MAR pg. 16
Approved parasite controls limited, . . . MAR pg. 33

Double check insurance on broiler housing, . . . APR pg. 69
Separation important for open houses, . . . APR pg. 9
Migrating beetles can bring complaints, . . . APR pg. 64
Water softener may cause wet droppings, . . . APR pg. 64
Minimize vaccination reactions, . . . APR pg. 68
Extruded carcasses and feathers in broiler feed, . . . APR pg. 5
Male broilers unaffected by changing diet energy, . . . APR pg. 5
Pancreas may be involved in malabsorption syndrome, . . . APR pg. 6
Malabsorption syndrome can damage intestines, . . . APR pg. 5
Tunnel ventilation needs proper design, . . . MAY pg. 22
Multiple stressors affect performance additively, . . . MAY pg. 36
Four firms have 45 per cent of broiler volume, . . . MAY pg. 44
Dead bird disposal in The Netherlands, . . . MAY pg. 44
Sail switch reduced fan running time, . . . MAY pg. 8
Beetles did not affect broiler performance, . . . MAY pg. 8
Saving by late removal of vitamins/minerals, . . . MAY pg. 8
Another approach: Fasting heat stressed broilers, . . . JUN pg. 32
Respiratory vaccine reactions reduced by TLC, . . . JUN pg. 20
Chick livability better with satellite waterer, . . . JUN pg. 6
Be sure withdrawal feeds are drug-free, . . . JUN pg. 10
Environment a factor in respiratory ills, . . . JUN pg. 10
Chick anemia agent: a new, different disease, . . . JUN pg. 42
More protein decreases ochratoxin effects, . . . JUN pg. 6
Broiler litter suitable in composted planting mix, . . . JUN pg. 6
Stocks react differently to trimming of beaks, . . . JUN pg. 8
Protect respiratory tract against Newcastle virus, . . . JUN pg. 6
Immune system and salmonella resistance, . . . JUN pg. 8
Managing bird migration in tunnel ventilated houses, . . . JUL pg. 32
Minerals may play role in sudden death syndrome, . . . JUL pg. 6
Extruded dead bird meal safe as feed ingredient, . . . JUL pg. 8
Climate may be factor in cryptosporidiosis, . . . JUL pg. 8
Dyschondroplasia varies with companies, . . . JUL pg. 6
Development of drug resistance a certainty, . . . JUL pg. 10
Broiler niacin needs, . . . AUG pg. 6
ILT: is eradication feasible?, . . . AUG pg. 14
Most effective feed withdrawal times, . . . AUG pg. 6
Carbohydrates retard salmonella colonization, . . . AUG pg. 6
Cold adapted viruses show promise as vaccines, . . . AUG pg. 6
Seed from weed can contaminate feed, . . . AUG pg. 8
Keep poultry waste away from water, . . . AUG pg. 10
How to avoid future problems with MD, . . . AUG pg. 10
Disease control and management related, . . . AUG pg. 10
Variety of signs make reoviruses complex challenge, . . . SEP pg. 15
Salmonella monitoring system simplifies evaluation, . . . SEP pg. 46
Apply heat stress data with caution, . . . SEP pg. 11
Vitamin pack helps during heat stress, . . . SEP pg. 42
Heat exchanger broiler houses have advantages, . . . SEP pg. 6
Boric acid treatment for darkling beetles, . . . SEP pg. 6
Drinker water depth affects litter conditions, . . . SEP pg. 6
Tenosynovitis lesions differentiated early, . . . SEP pg. 6
A simple skin test for immune response, . . . SEP pg. 8
Chick passage effects on campylobacter virulence, . . . SEP pg. 10
Fusarium toxicity complex, . . . SEP pg. 11
Listeria colonization of broilers studied, . . . SEP pg. 10
Changes in viral nature make control difficult, . . . SEP pg. 10
Farm size not factor in broiler performance, . . . OCT pg. 6
Broilers do well under various light sources, . . . OCT pg. 6
Yeast improved feed conversion of broilers, . . . OCT pg. 6
Lighting may affect skeletal disease, . . . OCT pg. 6
Chick anemia agent prevalent in Delmarva, . . . OCT pg. 6
Fowl cholera showing up in Georgia broilers, . . . OCT pg. 6
Salmonella surveyed in retail broilers, . . . OCT pg. 8
Right side heart failure said main cause of ascites, . . . NOV pg. 6
Effect of high protein corn on broilers, layers, . . . NOV pg. 6
Saving broiler house energy being studied, . . . NOV pg. 36
Electricity use compared in tunnel, natural ventilation, . . . NOV pg. 13
Water quality: what is it?, . . . NOV pg. 12
IB control still a major challenge, . . . NOV pg. 37
Salmonellae prevention ideas in broilers, broiler breeders, . . . DEC pg. 12
Cause of transient toxicosis unknown, . . . DEC pg. 16
Chicken anemia agent found in United States, . . . DEC pg. 6
Control wild birds in poultry houses, . . . DEC pg. 9

BROODING AND REARING

Prevent problems with maintenance, . . . FEB pg. 50
Water softener may cause wet droppings, . . . APR pg. 64
Minimize vaccination reactions, . . . APR pg. 68

Extruded carcasses and feathers in broiler feed, . . . APR pg. 5
Male broilers unaffected by changing diet energy, . . . APR pg. 5
Salmonella infection at day-old more severe, . . . APR pg. 5
Start monitoring pullets at four weeks, . . . MAY pg. 43
Bordetella now being isolated from chickens, . . . MAY pg. 10
Pest management programs demand special attention, . . . JUL pg. 16
Managing bird migration in tunnel ventilated houses, . . . JUL pg. 32
Out-of-season production of pullets demands caution, . . . SEP pg. 38
Variety of signs make reoviruses complex challenge, . . . SEP pg. 15
Salmonella monitoring system simplifies evaluation, . . . SEP pg. 46
Vitamin pack helps during heat stress, . . . SEP pg. 42
Boric acid treatment for darkling beetles, . . . SEP pg. 6
Drinker water depth affects litter conditions, . . . SEP pg. 6
A simple skin test for immune response, . . . SEP pg. 8
Listeria colonization of broilers studied, . . . SEP pg. 10
Changes in viral nature make control difficult, . . . SEP pg. 10
Optimize broiler house insulation with computer, . . . OCT pg. 20
Salmonellae prevention ideas in broilers, . . . DEC pg. 12

ECOLOGY AND WASTE HANDLING

Manure and solar heat killed weeds, . . . FEB pg. 50
Nutrients in broiler litter vary widely, . . . FEB pg. 13
Keep poultry wastes away from water, . . . AUG pg. 10

EGGS

An egg industry perspective: Ready for the 21st century?, . . . JAN pg. 22
Corn particle size did not affect layers, . . . JAN pg. 8
Maintenance prolongs layer facility life, . . . JAN pg. 71
90 per cent of production from 500-plus egg firms, . . . JAN pg. 58
More space per hen in cages requested, . . . JAN pg. 52
Cage layer fatigue causes are complex, . . . JAN pg. 52
Factors that cause cage layer fatigue, . . . JAN pg. 31
Phase feeding layers by consumption, . . . FEB pg. 46
Many factors contribute to cage layer fatigue, . . . FEB pg. 52
ELISA test for SE sensitive diagnostic tool, . . . FEB pg. 13
Don't wait too long for final beak trim, . . . FEB pg. 12
Cage-grown layers had better feathering, . . . FEB pg. 14
Brown egg hens less affected by short fast, . . . FEB pg. 14
Placing rodent baits in high-rise houses, . . . MAR pg. 13
Southern California egg production costs, . . . APR pg. 65
Crouching syndrome in caged layers, . . . APR pg. 68
Heat stress duration and egg quality, . . . APR pg. 5
61 per cent of U. S. layers owned by 59 firms, . . . APR pg. 68
Culling non-layers saves a lot of feed, . . . APR pg. 10
Western Disease Conference papers on salmonella, . . . MAY pg. 14
Moving pullets requires efforts to reduce stress, . . . MAY pg. 32
Start monitoring pullets at four weeks, . . . MAY pg. 43
British scientists want more hen space, . . . MAY pg. 44
Supplemental calcium supplied via water, . . . MAY pg. 8
Effect of salt removal on layer performance, . . . MAY pg. 8
MG eradication termed more efficient for layer flock, . . . JUN pg. 12
Confinement system for chickens humane, . . . JUN pg. 11
Full-fat canola meal a source of xanthophyll, . . . JUN pg. 6
Layer feed conversion poorer in deep cages, . . . JUL pg. 6
Age of hen affects xanthophyll disposition, . . . JUL pg. 6
Corn gluten feed can be fed in molt program, . . . JUL pg. 6
Too much vitamin A said toxic to layers, . . . JUL pg. 31
Egg cracks can occur at a variety of places, . . . JUL pg. 10
Enzyme-treated barley helped lay, . . . AUG pg. 6
Seed from weed can contaminate feed, . . . AUG pg. 8
Urolithiasis is a complex disease, . . . AUG pg. 13
Causes of prolapse in laying flocks, . . . SEP pg. 42
Selection might cut uncollectible eggs, . . . SEP pg. 6
Cage-reared pullets had higher rate of lay, . . . OCT pg. 8
Egg producers vote to eliminate refunds, . . . OCT pg. 38
Have lay house ready for pullets, . . . NOV pg. 29
Layers reacted quickly to jump in temperature, . . . NOV pg. 6
Effect of high protein corn on broilers, layers, . . . NOV pg. 6
FDA classifies eggs 'potentially hazardous', . . . DEC pg. 16
Prevent osteoperosis in the older layers, . . . DEC pg. 64
Incubation enhances salmonellae isolation, . . . DEC pg. 6

FEEDS AND FEEDING

Stimulating feed intake of chickens, . . . JAN pg. 56
Managing feed withdrawal, . . . JAN pg. 48
Do not store feed for long periods, . . . JAN pg. 31
Corn particle size did not affect layers, . . . JAN pg. 8
Phase feeding by consumption for layers, layer breeders, . . . FEB pg. 46
Breeder hen nutrition, feed quality potential problems, . . . FEB pg. 30

One of these things is not like the others...

Give them a fresh change of pace, with quality wood shavings from American Wood Fibers. American has the options you need to help your business grow:

- **Absorbent Baled Shavings**
- **Ponderosa Pine or Northern Pine**
- **Screened or Mill-Run**
- **Kiln-Dried**
- **Multiple Grades/Sizes**
- **Year-Round Availability**
- **Conveniently Packaged**
- **Competitively Priced**

Best of all, we offer *exceptional customer service and prompt delivery* that's second to none in our field.

Call 1-800-642-5448 to place your order *today* —and give *your* operation a perk!

AMERICAN WOOD FIBERS
Schofield, WI 54476-0468 • 1-800-642-5448
Locations also in: Prentice, WI Pella, IA

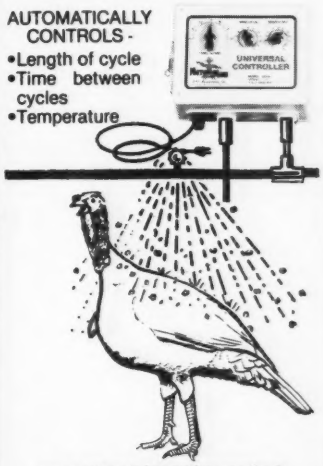
Circle No. 16 on Inquiry Card

Beat the Heat!

INSTALL METER-MAN
UNIVERSAL COOLING SYSTEM

- Cools poultry automatically.
- Controls dust problems.
- Improves feed conversion.
- Increases rate of gain.

AUTOMATICALLY CONTROLS -
- Length of cycle
- Time between cycles
- Temperature



For further information contact:
METER-MAN, INC.

1331 Union Avenue, Suite 1500
Memphis, TN 38104
Phone: 901-272-7511 Fax: 901-272-2926

Responding to the needs of the poultry industry with accurate and precise analytical tesing:

Amino Acids
Antibiotics
Drugs
Elements
Lipids
Microbiology
Mycotoxins
Nutrition Labeling
Pesticides and Other Residues
Proximate
Vitamins

With six laboratories strategically located in the South, Southeast and Midwest to serve you:

North Little Rock, AR	**501-374-5181**
Gainesville, GA	**404-536-5909**
Des Moines, IA	**515-265-1461**
Goldston, NC	**919-837-2121**
Dayton, OH	**513-222-4179**
Memphis, TN	**901-525-6333**

ANNUAL INDEX

Low protein did not enhance natural mating, . . . FEB pg. 13
Chicks better when older hens were fed zinc, . . . FEB pg. 13
Mycotoxin effects worse when in combination, . . . FEB pg. 14
Mycotoxins can cause immunosuppression, . . . FEB pg. 17
Flavoring feed might control breeder growth, . . . MAR pg. 6
Longer day improved turkey feed conversion, . . . MAR pg. 8
Enzyme-treated barley suitable for turkeys, . . . MAR pg. 8
Prebreeder protein levels for turkey hens, . . . MAR pg. 10
Extruded carcasses and feathers in broiler feed, . . . APR pg. 5
Male broilers unaffected by changing diet energy, . . . APR pg. 5
Grain and protein source effects on broilers, . . . APR pg. 5
Be sure withdrawal feeds are drug-free, . . . JUN pg. 10
More protein decreases ochratoxin effects, . . . JUN pg. 6
Effects of nutrients on immunity are variable, . . . JUN pg. 6
Treating corn with mold inhibitor improved hatch, . . . JUL pg. 6
Layer feed conversion poorer in deep cages, . . . JUL pg. 6
Corn gluten meal can be fed in molt programs, . . . JUL pg. 6
Extruded dead bird meal safe as feed ingredient, . . . JUL pg. 8
Too much vitamin A said toxic to layers, . . . JUL pg. 31
Enzyme-treated barley helped lay, . . . AUG pg. 6
Seed from weed can contaminate feed, . . . AUG pg. 8
Reducing separation of feed ingredients, . . . SEP pg. 43
Fusarium toxicity complex, . . . SEP pg. 11
Yeast improved feed conversion in broilers, . . . OCT pg. 6
Effect of high protein corn on broilers, layers, . . . NOV pg. 6
Feed withdrawal time affects meat quality, . . . DEC pg. 6
Wasted feeds ups turkey costs, . . . DEC pg. 64
Virginiamycin-monensin combination for turkeys, . . . DEC pg. 8

HOUSING AND EQUIPMENT

Mechanical nest features to consider when buying, . . . FEB pg. 18
Prevent problems with maintenance, . . . FEB pg. 50
Georgia grower's houses designed for efficiency, profit, . . . APR pg. 12
Winter ventilation needed for turkey, . . . APR pg. 70
Double check insurance on broiler housing, . . . APR pg. 69
Separation important for open-type housing, . . . APR pg. 9
Tunnel ventilation needs proper design, . . . MAY pg. 22
British scientists want more hen space, . . . MAY pg. 44
Sail switch reduced fan running time, . . . MAY pg. 8
Beetles did not affect broiler performance, . . . MAY pg. 8
Inlet size affects air distribution, . . . JUN pg. 42
Managing bird migration in tunnel ventilated houses, . . . JUL pg. 32
Intermittent light helped turkey hen performance, . . . JUL pg. 8
Evaluating lighting systems for broiler breeders, . . . AUG pg. 20
Heat exchanger broiler houses have advantage, . . . SEP pg. 6
Optimize broiler house insulation with computer, . . . OCT pg. 20
Broilers do well under various light sources, . . . OCT pg. 6
Electricity use compared in tunnel, natural ventilation, . . . NOV pg. 13
Saving broiler house energy being studied, . . . NOV pg. 36
Control wild birds in poultry housing, . . . DEC pg. 9

MANAGEMENT

Ozone may adversely affect hatchability, . . . JAN pg. 6
Irradiation did not affect hatchability, . . . JAN pg. 6
Ramps, barriers aid broiler muscle growth, . . . JAN pg. 6
Cooled roosts cut mortality from heat, . . . JAN pg. 6
Reduce insulation damage by lesser mealworm, . . . JAN pg. 6
Light and energy effects on tom market turkeys, . . . JAN pg. 8
Maintenance prolongs layer facility life, . . . JAN pg. 71
Do not store feed for long periods, . . . JAN pg. 31
Manure storage must improve, . . . JAN pg. 15
Insulation pests killed by compound, . . . JAN pg. 71
Stimulating feed intake of chickens, . . . JAN pg. 56
Broiler breeder maturation process demands attention, . . . FEB pg. 38
Manure and solar heat killed weeds, . . . FEB pg. 50
Management affects performance of breeders, . . . FEB pg. 12
Don't wait too long for final beak trim, . . . FEB pg. 12
Approved parasite controls limited, . . . MAR pg. 33
Rearing under bright light reduced bruising, . . . MAR pg. 6
Use caution with day-old IBD vaccination, . . . MAR pg. 6
Placing rodent baits in high-rise houses, . . . MAR pg. 13
How to reduce water vaccination failures, . . . MAR pg. 14
Don't forget rodent control, . . . MAR pg. 16
Migrating beetles can bring complaints, . . . APR pg. 64
Monensin for turkeys requires caution, . . . APR pg. 65
Minimize vaccination reactions, . . . APR pg. 68
Multiple stressors affect performance additively, . . . MAY pg. 36
Moving pullets requires efforts to reduce stress, . . . MAY pg. 32
Start monitoring pullets at four weeks, . . . MAY pg. 43
Fingerprinting valuable to identify pasteurella, . . . MAY pg. 8
Turkey breast buttons from poor quality litter, . . . MAY pg. 10
Another approach: Fasting heat stressed broilers, . . . JUN pg. 32
Be sure withdrawal feeds are drug-free, . . . JUN pg. 10
Environment a factor in respiratory ills, . . . JUN pg. 10

Biosecurity pays in cholera control, ... JUN pg. 42
Inlet size affects air distribution, ... JUN pg. 42
Stocks react differently to trimming of beaks, ... JUN pg. 8
Protect respiratory tract against Newcastle virus, ... JUN pg. 6
Iodine levels suggested for turkey breeder hens, ... JUN pg. 8
Pest management programs demand special attention, ... JUL pg. 16
Managing bird migration in tunnel ventilated houses, ... JUL pg. 32
Bigness can bring nuisance complaints, ... JUL pg. 11
ILT: is eradication feasible?, ... AUG pg. 14
Evaluating lighting systems for broiler breeders, ... AUG pg. 20
Most effective feed withdrawal times, ... AUG pg. 6
Disease control and management related, ... AUG pg. 10
Minimizing contamination of hatching eggs a must, ... SEP pg. 36
Salmonella monitoring system simplifies evaluation, ... SEP pg. 46
Out-of-season pullet production demands caution, ... SEP pg. 38
Apply heat stress data with caution, ... SEP pg. 11
Reducing separation of feed ingredients, ... SEP pg. 43
Vitamin pack helps during heat stress, ... SEP pg. 42
Boric acid treatment for litter beetles, ... SEP pg. 6
Drinking water depth affects litter conditions, ... SEP pg. 6
Meter aids accurate water medication, ... OCT pg. 37
Spitzer Farm composts mortalities from 300,000 turkeys, ... NOV pg. 22
Have lay house ready for pullets, ... NOV pg. 29
New techniques help on disease problems, ... NOV pg. 37

ANNUAL INDEX

Somatostatin termed ineffective for birds, . . . MAR pg. 8
Fowl cholera cases in Georgia analyzed, . . . MAY pg. 44
Bordetella now being isolated from chickens, . . . MAY pg. 10
Reticuloendotheliosis egg transmission low, . . . MAY pg. 10
Another approach: Fasting heat stressed broilers, . . . JUN pg. 32
Respiratory vaccine reactions reduced by TLC, . . . JUN pg. 20
MG eradication termed more efficient for layer flock, . . . JUN pg. 12
Chick anemia agent: a new, different disease, . . . JUN pg. 42
Effects of nutrients on immunity are variable, . . . JUN pg. 6
Protect respiratory tract against Newcastle virus, . . . JUN pg. 6
Two new pasteurella mutants evaluated, . . . JUN pg. 8
Minerals play role in sudden death syndrome, . . . JUL pg. 6
Climate may be factor in cryptosporidiosis, . . . JUL pg. 8
Dyschondroplasia varies with companies, . . . JUL pg. 6
P. anatipestifer reported in turkeys, . . . JUL pg. 10
Development of drug resistance a certainty, . . . JUL pg. 10
Disease control and management related, . . . AUG pg. 10
ILT: is eradication feasible?, . . . AUG pg. 14
Carbohydrates retard salmonella colonization, . . . AUG pg. 6
Cold adapted viruses show promise as vaccines, . . . AUG pg. 6
Congo red not indicator of E. coli pathogenicity, . . . AUG pg. 8
Genotyping helpful in study of fowl cholera, . . . AUG pg. 8
Mild HE may predispose to colibacillosis, . . . AUG pg. 6
How to avoid future problems with MD, . . . AUG pg. 12
Uroliathisis is a complex disease, . . . AUG pg. 13
Variety of signs make reoviruses complex challenge, . . . SEP pg. 15
Salmonella monitoring system simplifies evaluation, . . . SEP pg. 46
Chick passage effects on campylobacter virulence, . . . SEP pg. 10
Listeria colonization of broilers studied, . . . SEP pg. 10
Changes in viral nature make control difficult, . . . SEP pg. 10
Lighting may affect skeletal disease, . . . OCT pg. 6
Chick anemia agent prevalent in Delmarva, . . . OCT pg. 6
Fowl cholera showing up in Georgia, . . . OCT pg. 6
Another influenza virus becomes pathogenic, . . . OCT pg. 8
Right side heart failure said main cause of ascites, . . . NOV pg. 6
Plan well before vaccinating for MG, . . . NOV pg. 8
Stray voltage may have caused poult deaths, . . . NOV pg. 10
New anticoccidial effective for turkeys, . . . NOV pg. 10
Killed MG bacterin did not prevent infection, . . . NOV pg. 11
New techniques help on disease problems, . . . NOV pg. 37
Misquito may spread anatipestifer agent, . . . NOV pg. 29
Avoid fowl cholera vaccination mistakes, . . . NOV pg. 28
IB control still a major challenge, . . . NOV pg. 37
Salmonellae prevention ideas in broilers, broiler breeders, . . . DEC pg. 12
Causes of transient toxicosis unknown, . . . DEC pg. 16
Chicken anemia agent found in United States, . . . DEC pg. 6
Fingerprinting of microorganisms, . . . DEC pg. 64
Maternal antibody gives long HE protection, . . . DEC pg. 7
Green liver not best inflamation indicator, . . . DEC pg. 7

TURKEYS

Turkey rhinotracheitis, swollen head syndrome cause loss, . . . JAN pg. 16
Light and energy effects on tom market turkeys, . . . JAN pg. 8
Litter can cause turkey leg problems, . . . JAN pg. 59
Understand eggs, hatching to improve quality of poults, . . . FEB pg. 24
Cryptosporidia and viral hepatitis in turkeys, . . . MAR pg. 8
Longer day improved turkey feed conversion, . . . MAR pg. 8
Prebreeder protein levels for turkey hens, . . . MAR pg. 10
Monensin for turkeys requires caution, . . . APR pg. 65
Recovered turkeys can carry fowl cholera, . . . APR pg. 9
Effects of toe clipping on market turkeys, . . . APR pg. 8
Winter ventilation needed for turkeys, . . . APR pg. 70
Turkey hatching egg sanitizers compared, . . . APR pg. 7
More eggs from step-down step-up turkey lighting, . . . APR pg. 8
15 top turkey firms are same as in 1989, . . . MAY pg. 43
Some Mycoplasma iowae are more pathogenic, . . . MAY pg. 8
Reticuloendotheliosis egg transmission low, . . . MAY pg. 10
Turkey breast buttons from poor quality litter, . . . MAY pg. 10
Iodine levels suggested for turkey breeder hens, . . . JUN pg. 8
Two new pasteurella mutants evaluated, . . . JUN pg. 8
Intermittent light helped turkey hen performance, . . . JUL pg. 8
P. anatipestifer reported in turkeys, . . . JUL pg. 10
Genotyping helpful in study of fowl cholera, . . . AUG pg. 8
Mild HE may predispose to colibacillosis, . . . AUG pg. 6
Spitzer Farm composts mortalities from 300,000 turkeys, . . . NOV pg. 22
Turkey parts survey for salmonellae, . . . NOV pg. 36
Height of fogger lines adjustable, . . . NOV pg. 28
Tom poults from force molted hens grow larger, . . . NOV pg. 6
Stray voltage may have caused poult deaths, . . . NOV pg. 10
New anticoccidial effective for turkeys, . . . NOV pg. 10
Toe trimming growing turkeys, . . . DEC pg. 17
Wasted feed ups turkey costs, . . . DEC pg. 64
Green liver not best inflamation indicator, . . . DEC pg. 7
Turkey rhinotracheitis virus hard to isolate, . . . DEC pg. 8
Virginiamycin-monensin combination for turkeys, . . . DEC pg. 8
